

Community Field Project
**Howe Sound Secondary &
Squamish Elementary Schools**

School Community Connections

School Community Connections is a program that is co-managed by the BC School Trustees Association (BCSTA) and the Union of BC Municipalities (UBCM). Their mandate is to, "Make better use of our school spaces so they benefit BC communities. The School Community Connections program will help school boards and local governments revitalize schools as centres for community learning and activity".

School District No. 48 (Howe Sound) and the District of Squamish have entered into a partnership agreement through the School Community Connections program to upgrade the playing field at Howe Sound Secondary School and Squamish Elementary School to a standard suitable for community use.

A committee was formed with representatives from the School District and the District of Squamish to plan and implement this field upgrade. The committee has consulted with the principals and staff of Howe Sound Secondary and Squamish Elementary, the field users at Brennan Park, and the public. The plan you see here was chosen by the committee after consultation with these groups and considering the funding we expect to be available for the project.

The cost of this project in 2007 dollars is approximately \$600,000.00. Of that \$125,000.00 is coming as a grant from the School Community Connections program, \$300,000.00 is coming from the District of Squamish and the School District is contributing \$50,000.00. We are currently searching for funding partners to provide the remaining \$125,000.00.

The plan is to begin construction in fall 2008 with the field ready for use in spring 2009. We are very excited to be working in partnership with the District of Squamish on this worthwhile project that will benefit our students and the community of Squamish.

For further information on this project please contact Nancy Edwards, Secretary/Treasurer at 604-892-5228 or nedwa@sd48.bc.ca
